

Sun Life Canada

- Building Name: Sun Life Centre
- Size of space: 600 sq m
- Number of seats: 80 seats
- Transaction completed in approximately 2 months

Requirement

Sun Life Shared Services is the support arm of Sun Life Financial Philippines, an insurance, pension and education plan, and mutual fund provider in the Philippines. The client was in need of a space within the Sun Life Centre building that can accommodate 80 to 100 workstations as well as provide private offices for management, conference rooms, huddle/interview rooms and training space for their expansion. Sun Life Shared Services also required significant IT support in integrating with their existing facilities located in the building's other floors.

Challenge

The challenge for KMC Solutions was to find a suitable space within the same building as their other offices. It was imperative that KMC Solutions provide the client with a smooth transition into this new space and to provide the space within the client's timeframe. Some of the client's more specific requirements included interview rooms, private offices for managers and human resources, a spacious workstation layout, and a dedicated pantry area.

Solution

KMC Solutions was successfully able to provide for all of Sun Life Shared Services' requirements.

- Wide network of contacts: Thanks to KMC Solutions and KMC MAG Group's wide network of contacts, the client was able to secure a space within their required timeframe.
- Reliable IT and technical support team: KMC Solutions was able to provide excellent IT and technical support services that allowed the offices of Sun Life Shared Services to be fully connected to their other offices within the same building.
